Started on Monday, 17 April 2017, 10:32 PM

State Finished

Completed on Monday, 17 April 2017, 10:41 PM

Time taken 9 mins 2 secs

Question 1 Complete Marked out of 5.00

Common components within a service-level agreement include which of the following:

Select one:

- a. Run-time monitoring capabilities and event notification
- b. System uptime, normally expressed as a percentage, such as 99.9 percent
- c. Billing policy for various types of resource use (e.g., CPUs, disk space, and databases)
- d. Technical support operations (e.g., call-time delay and event response time)
- e. All of the above

Question 2	Complete	Marked out of 5.00
The AH mode of IF the packet.	Sec provides	authentication of two endpoints and adds a(n) to
Select one:		
a. checksum		
b. expiration	date	
oc. TTL		
d. identifier		
Question 3	Complete	Marked out of 5.00
Which of the follow parameters?	ving is used b	y two IPSec hosts to negotiate their security
Select one:		
a. Internet K	Ley Exchange	
b. A certific	ate	
c. Kerberos		
d. A pre-sha	red key	

Question 4	Complete	Marked out of 5.00
	•	ovider does not support data export or when a le through others.
Select one:		
a. None of	the above	
b. Cloud sto	orm	
oc. Cloud bu	rsting	
d. Vendor lo	ock-in	
Question 5	Complete	Marked out of 5.00
		on algorithms performs three rounds of encryption giving an effective key length of 168-bits?
Select one:		
a. Data Enci	ryption Standa	ard (DES)
b. Message	Digest 5	

c. Triple Data Encryption (3 DES)

d. Secure Hashing Algorithm

Ques	tion 6	Complete	Marked out of 5.00
	duce risk, con ce code in a _		ask a cloud solution provider to place their site's
Select	t one:		
\circ	a. black box		
\circ	b. virtual wir	ndow	
\circ	c. cloud vau	lt	
0	d. source-co	de escrow	
Ques	tion 7	Complete	Marked out of 5.00
Whic	h of the follow	ring is a comp	ponent of an IPSec policy rule?
Select	t one:		
0	a. Encryption	n type	
\circ	b. IPSec filte	r action	
\circ	c. TTL		
0	d. Expiration	date	

Ques	Complete Marked out of 5.00
	defines the resources the solution will need to operate
Satisi	actorily.
Select	one:
•	a. capacity plan
\circ	b. performance log
\circ	c. virtual map
\circ	d. cloud coverage
Ques	Complete Marked out of 5.00
Most	firewall rules control access to resources based on the
Select	one:
\circ	a. source IP address
\circ	b. destination IP address
•	c. encryption type
\circ	d. pre-shared key

Which of the following can be used as a troubleshooting tool for remote access?

Select one:

- a. Connection Manager Administration Kit
- o b. RRAS
- c. RADIUS
- d. Network Monitor

Question 11 Complete Marked out of 5.00

With the IP Security Policy tool, network administrators can specify the encryption to be applied only to a specific application instead of all the applications on the network.

Select one:

- True
- False

Question 12 Complete Marked out of 5.00

The manager's key tool for managing the cloud-service provider is the SLA. The Service Level Agreement should contain specifics about key performance issues, policies and procedures, and clear definitions of all levels of responsibility.

Select one:

- True
- False

Question 13	Complete	Marked out of 5.00
_		id, IT managers shift a great deal of day-to-day se department to the cloud solution provider.
Select one:		
True		
False		
Question 14	Complete	Marked out of 5.00
. , ,		cloud provider, a manager should be aware of e-commerce processing, employee screening, and
Question 15	Complete	Marked out of 5.00
The IP Security (IPS		gy is designed to protect TCP/IP and all the ernet layer.

False

Question 16	Complete	Marked out of 5.00
		olution, an IT staff should periodically audit key pplication is providing correct results.
Select one:		
True		
False		
Question 17	Complete	Marked out of 5.00
The encryption or communication be		n run under the transport mode protects the uters,
O True		
• False		
Question 18	Complete	Marked out of 5.00
Just because a con	npany provide	es a solution does not mean that the solution is
Select one:		
• True		
O False		

|--|

If authentication, not encryption, is the required security measure, the tunnel mode or the transport mode can team up with the AH algorithm to secure IP communication.

Select one:

- True
- False

Question 20 Complete Marked out of 5.00

To identify potential system bottlenecks, detect errors within the system, and identify system-resource use, the IT manager may examine various system log files.

Select one:

- True
- False
